Final Project Proposal

For my final project, I want to continue the Hogwarts-style theme I have been using in my previous assignments. My idea is to create a BuzzFeed-style quiz page where users answer a short quiz and receive a fun, randomized result, such as which Hogwarts house they belong to or what type of character they would be in a specific movie. As users complete the quiz, they will be added as users to the site. Whenever they return or sign in again with the same username, they will no longer see the quiz. Instead, they will see a personalized welcome page that shows their previously generated character along with information related to it.
